

## Mast lifts for indoor use

Our series of compact and flexible mast lifts for working safely indoors. Our lifts are characterised by low entry, short turning radius and low weight.

They make working at height efficient and safe, eliminating the need for ladders.

Our lifts are manufactured in Sweden and are CE marked in accordance with the high standards of safety in the EC and EN280 standards.

## Areas of use

Our products are developed to facilitate work in, for example, trade, installation, cleaning, property upkeep, warehouse and construction industry.

All our products are easy to use and maintain. All lifts are delivered assembled and ready to start. At the end of the working day, the lift is connected to a standard wall outlet and the built-in charger charges the batteries.

It hardly becomes any smoother than that.

A man in a blue shirt and black pants is operating a white and yellow mast lift in a motorcycle dealership. The lift is on wheels and has a platform for the operator. The background shows rows of motorcycles and a red car. The lift has a control panel with a yellow emergency stop button.

✓ SMOOTH  
✓ SAFE  
✓ SMART

A NEW GENERATION  
OF MAST LIFTS FOR  
INDOOR USE

A full-page photograph of a warehouse aisle. A worker in a dark blue long-sleeved shirt and dark trousers is standing on a yellow and white scissor lift. The lift is positioned in the center of the aisle, facing away from the camera. The aisle is lined with high industrial shelving units on both sides. The shelves are filled with various items, including cardboard boxes and large, wrapped pallets. The floor is a smooth, light-colored concrete. In the background, a red fire door is visible at the end of the aisle. Three yellow callout boxes with black text are overlaid on the image, highlighting key features of the lift: '4.95M WORKING HEIGHT' at the top, 'STABLE CONSTRUCTION' in the middle, and '320KG DEAD WEIGHT' at the bottom right.

**4.95M**  
WORKING HEIGHT

**STABLE CONSTRUCTION**

**320KG**  
DEAD WEIGHT

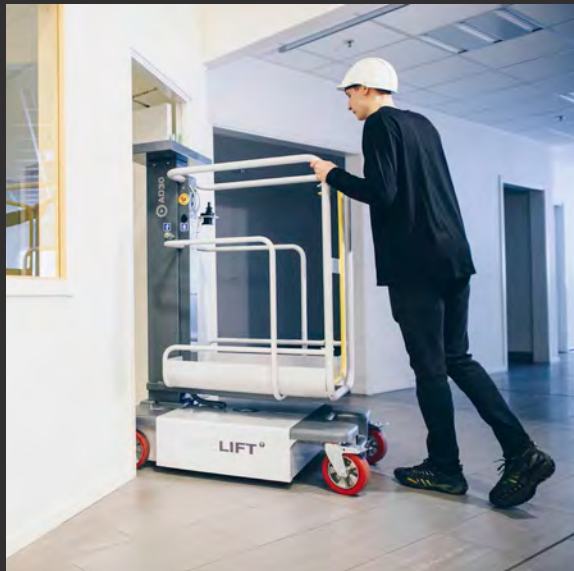

## OUR PRODUCTS

All our models are manufactured with a working height of 4.95 m. The mast lifts are safe and easy to use and require minimal maintenance. The lifts are delivered ready for use on EU pallets. At the end of the working day, the lift is connected to a standard wall outlet and the built-in charger charges the batteries.

### **PushAround**

Manually moved to where it's needed.

### **MoveAround**

Operated with a joystick from the basket.

**SAFE AND EFFICIENT  
WORK AT HEIGHT**

## ADVANTAGES

### **Decoupling**

The drive is disconnected with a simple grip and the lift is manually moved.

### **Operating instructions**

A smart compartment makes the instruction manual always easily accessible.

### **Small turning radius**

With a small turning radius of 1.2m, the lift easily takes the corner.

### **Anchorage point**

When the harness is required.

### **USB socket**

USB sockets are available for easy charging of tablet or mobile device.

### **Emergency stop**

If the accident is close by.

## SPECIFICATIONS

Size of the platform .....	0.53 x 0.76 m
Total load on the platform .....	Max 180 kg
Total number of people .....	Max 1
Working height .....	4.95 m
Height of platform .....	2.95 m
Lifting speed (2.95 m) .....	16 seconds
Weight .....	320 kg
Total width .....	0.76 m
Total height .....	1.64 m
Total length .....	1.2 m
MoveAround driving speed lowered .....	4 km/h
MoveAround driving speed raised .....	2 km/h
Power source .....	2 pcs 75 Ah (C20) 12 V batteries, maintenance-free
Line voltage .....	24 V
Battery charger .....	230 V, 50 Hz / 60 Hz
Lifting system .....	Single manoeuvred hydraulic cylinder
Wheels .....	Diameter 200 mm, polyurethane coating, leaves no marks
Parking brakes for PushAround .....	Manual foot brakes
Parking brakes for MoveAround .....	Automatic
Height of the platform's railing .....	1.1 m
Height of skirting board .....	0.15 m

Address: Unit 16 Hawksley Court  
Hawksley Street Industrial Estate  
Oldham  
OL8 4PQ
